Why team with InFocus Electronics Technology?

- We give you a competitive advantage:
 - » Fair, comprehensive costing - no surprises.
 - » High yields mean no troubleshooting costs later.
 - » On-time delivery compatible.
 - » Design for Manufacturability Review by our Manufacturing Engineers.
 - » Quick Turn Engineering prototypes to speed new product introduction (NPI)
 - » Cost-conscious full volume production.
- We have state-of-the art capabilities.
- We listen. We learn your goals and offer options to meet and exceed them. We work hard to be considered a valuable part of your team.

- Design for Manufacturability Evaluation and Process Plan is included in initial assessment
- High Speed PCB Layout Design
- Firmware Development
- Mechanical Design
- Technical Program Management
- Box Build
- Conformal Coat or Potting
- Well-trained, motivated assemblers

- Full electrical testing to your protocol ensures 100% accurate build
- Workmanship Standards to IPC Class 2 or 3
- Documentation Management of Bill of Materials and Assembly Instructions
- Moisture Sensitive Parts Handling
- Electro-Static Discharge (ESD) Prevention
- Parts Sourcing ensures only approved parts are used
- Visual Inspections throughout the build

- Single - and Double-Sided Assembly
- Surface - Mount (SMT), Through-Hole and Mixed Technologies
- Ball Grid Array (BGA) to 0.4mm pitch, and 0402 Packaged Components
- RoHS - compliant or Leaded
- Aqueous Wash or No-Clean Processes
- One SMT Line
- Fully Automatic conveyor line

- Supply chain management
- Turnkey Component Sourcing - from your BOM and approved supplier list
- Component Cost Reduction
- End-of-Life and Obsolescence Notification & Resolution
- Automated Shipping Systems for FedEx and UPS
