Key BENEFITS

Information display & share and Data Capture

- Present and share up-to-date Centrally Controlled information such as Exhibitor info, Event schedules, Visitor Services, etc. without technical hassle through CMS to users.
- Through this we will be able to get user inputs as feedback, surveys, complains, etc. and analytics reports such as Visitor's engagement, footfall, user interest areas, Traffic hours, etc.

Wayfinder to navigate locally

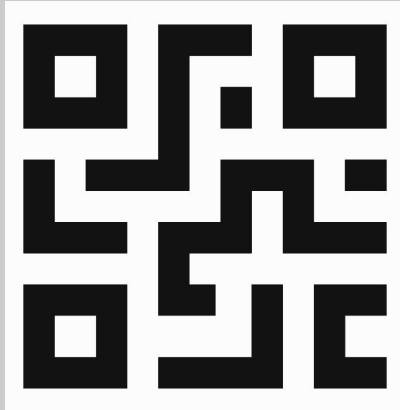

- Present and share up-to-date Centrally Controlled information such as Exhibitor info, Event schedules, Visitor Services, etc. without technical hassle through CMS to users.
- Through this we will be able to get user inputs as feedback, surveys, complaints, etc. and analytics reports such as Visitor's engagement, footfall, user interest areas, Traffic hours, etc.

Gamification & Interactive Quiz

- Engage your audience with interactive and engaging quizzes during the events.
- Create short games such as Jigsaw Puzzle, Spin the Wheel, Selfie Pictures, etc. to engage & capture user information via gaming.

QR code information sharing

- Digital directory system can be transferred to QR code solution where visitors can scan QR code and access whole directory features right on their phone. This can be further extended to -
 - Live navigation in case of navigation
 - Spot parking location
 - Showing offers and promotion, etc.

Digital FlipBook

- Transform your PDFs into beautiful digital publications.
- Reach as many readers as possible to boost engagement by adding rich media and interactive features.

Feedback/Surveys Solution

- Get real public feedback about the product, services, customer support, etc. with customer surveys/feedback form and identify their needs as compared to paper-based feedback/survey.

Ads and Promotions

- It can be used for Quick Onboarding, Easy-to-Scale & Measurable Advertising Platform for lead generation, additional monetization, scheme launch, achievement promotion, product launch, events and much more.
