

Bandhan Electronics and Communications

Company Profile

Welcome to Bandhan Electronics and Communications.

We like to introduce as an independent distributor of Semiconductors and Industrial Electronic components since 2022. We are Distributor and Dealer of Semiconductors & Industrial Electronic components. We are specialized in highly allocated, rare, hard to find and obsolete products in electronic components, integrated circuits and semiconductors

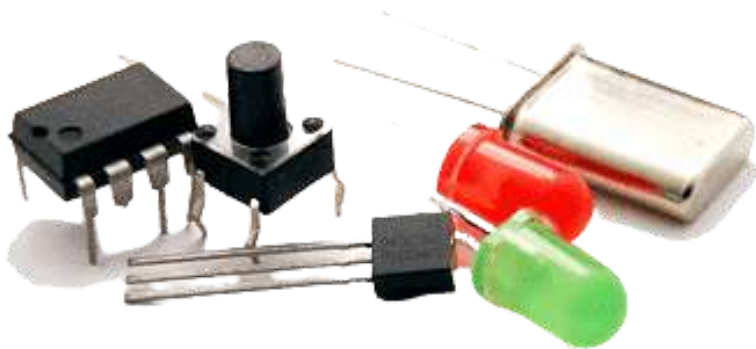

We have large inventory of major brands of semiconductors like Analog Devices Inc., Atmel, Altera, Avx, Burr Brown, Catalyst, Cypress, Dallas, Fair Child, Harris, Intel, Kemet, Lattice, Motorola, National, Texas Instruments, Xicor, Xilinx, Hynix, Samsung, Hitachi, OKI brands of semiconductors.

We do more than just provide the clients with a wide assortment of electronic components. We combine the traditional approach of a high level of customer service with modern warehousing technology to provide you with the best possible experience when you need to source components. Our large extensive inventory allows you to get the part immediately, while our competitive prices save you money.

Our easy-to-use Electronic Part Search will allow you to instantly send RFQs on about 85% of the electronic parts inventory that is either in our stock or available worldwide. You'll also be able to send a separate request for quote on any obsolete rare and mil grade part that doesn't show up in our electronic part search engine, but will be available in our stock as the inventory is huge.

We understand that our clients face supply challenges.

We are here to solve those problems and do so with unlimited access to over our huge electronic component inventory and our vast product and industry knowledge.

We are also dealers and stockiest of solar energy products like solar modules, solar cells, solar chargers and solar lightings

Excess Inventory Solutions

In basic terms, excess solution means finding a lucrative and straightforward solution to the excess of our customers and underused inventory that is costing them money and taking up space. If the customers have a stock lot or a big amount of passive or active components in their inventory and wish to get rid of them for a reasonable price, they can contact us.

Our company is a Semiconductor & Electronic Component Stockist and a Bulk Buyer, specialized in purchasing obsolete leaded / unleaded, old date code stock and excess stock lots. We can provide the customers with the finest deals and pay them right away. If our clients do not want to sell their entire stock at once, we have another alternative for them; they may share their inventory list with us, market their components on consignment basis, and try to clear their entire stock against orders at their rates.

How does Bandhan Electronics and Communication do it?

- **Knowledgeable Sales Staff**
- **Competitive Pricing**
- **Hard to Find & Obsolete Parts**
- **90% Of Deliveries - Overnight**
- **No Line-Item Minimum**
- **24 Hour Phone & Fax Support**
- **Distributor of Electronics**
- **Hard to Find and Obsolete Electronics**
- **Distributor of Passive components**
- **One-On-One Personal Support**

BEC, is the Solution to your availability crisis. Put us to work for you. TODAY!

**Our inventory includes: IC's,
Transistors, Capacitors, Diodes,
Resistors, LEDS's, Switches, Relay's,
Connectors, and much more**
